

Grobe - Residential

Engineered Construction constructed a 3,990 square foot home in the Shorewood Hills village in Madison. Scope of work included everything from excavation of the site, concrete and masonry, carpentry and finish hardware as well as flooring, plumbing, electrical, and HVAC. The exterior is a beautiful stone finish and compliments the beautiful landscaping and trees surrounding the property. This home was completed in six months with special care shown to all aspects of the building process.

Commitment to Excellence

Engineered Construction's commitment to excellence is evident in our commitment to workmanship and quality, and by producing projects that EC and it's partners can be proud of.

We accomplish this through commitment to consistency, discipline, quality and most importantly, safety.
